ROMANIA –
VOIVODENI
Solar Panels

*Dear Friends and
Donors,*

In collaboration with the Romanian government, the European Union initiated a Green investment program to support its climate goals. The project involves, among other things, installation of solar panels. Our contact person, Denes Csaba, states that solar panels would be very beneficial for the elementary school in Voivodeni. The solar panels would be able to produce so much electricity that the school could be energy independent in the future. The Romanian government receives grants of SEK 48,000 for local project from the EU, provided that the remaining SEK 35, 000 can be raised locally. Denes turned to SB Foundation, which decided this summer to contribute the requested sum. Denes has now sent us these photos of the installation.

Thank you for your important support of SB Foundation's work!
With greetings from *Arne, Elisabeth, Gloria, Lena, Roger*
